

1994 INDEX

AEROSPACE

Advanced engineering steels for aerospace, 461
 Adhesive bonding in severe environments, 523
 ALUMINIUM, Superplastically formed, 196
 ANALYSIS
 A new advance in optical emission spectroscopy, 478
 Probing the surface to improve performance, 532
 AUTOMOTIVE MATERIALS
 Achieving fuel efficiency with sheet steel automobiles, 133
 New laminate sheet for car body panels, 582
 Productive system solutions for car bumpers, 14
 Structural adhesives in automotive applications, 418
 Taking the lead in materials recovery, 313
 The materials link to fogged windscreens, 580
 CERAMICS
 Cathodoluminescence for ceramics, 24
 Improving performance in ceramic matrix composites, 63
 The shrinking world of ferroelectric ceramics, 125
 COMMERCIALISING materials: the secrets of success, 625
 COMPOSITE MATERIALS
 Composite propellers for small boats?, 69
 Ceramic fibre composites under the acoustic microscope, 73
 Composites research: ten years at the cutting edge, 146
 Improving performance in ceramic matrix composites, 63
 Joining aluminium based metal matrix composites, 415
 Metal matrix composites for design and innovation (c), 80
 New laminate sheet for car body panels, 582
 Titanium based composites: exploiting the benefits, 66
 COPPER-nickel alloys, preventing biofouling with, 181
 CORROSION
 Biodegradation of materials in marine environments, 189
 Developments in materials to combat corrosion offshore, 193
 CUTTING
 Cutting tools: a crucial factor in productivity, 84
 Surface engineering of cutting edges, 141
 DESIGN
 Designer materials for fingerprint detection, 534
 New materials and materials design, 535
 ENVIRONMENTAL ISSUES
 Dealing with packaging waste, 306
 Environmental issues and adhesives, 422
 Environmental legislation: how worried should the non-ferrous metal sector be (c), 323
 Examining the options to clean up foundry melting, 77
 How do polymers fit into the environmental equation?, 303
 Introducing BS 7750: the environmental challenge, 316
 Old tyres are a burning issue, 310
 Taking the lead in materials recovery, 313
 The environmental audit: regulations and the polymer industry, 475
 FAILURE
 Failure is not just fracture, 249
 Preventing stress cracking in high density polyethylene, 246
 The importance of being specific, 472
 FERROELECTRIC ceramics, the shrinking world of, 125
 INFORMATION
 Product development: managing the flow of information, 17
 Taking STEPS towards materials information, 71
 Technical information and business decisions, 373
 The impact of modern materials telecommunications, 202
 INSPECTION
 Automatic surface inspection moves on, 201
 JOINING
 Adhesive bonding in severe environments, 523
 Environmental issues and adhesives, 422
 Joining aluminium based metal matrix composites, 415
 Laser welding provides tailored properties, 576
 Microwave technology for welding and joining, 526
 Structural adhesives in automotive applications, 418
 LASERS
 Laser forming: a force for the future?, 574
 Laser welding provides tailored properties, 576
 MAGNESIUM alloys: the next generation, 198
 MARINE TECHNOLOGY
 Biodegradation of materials in marine environments, 189
 Developments in materials to combat corrosion offshore, 193

Materials in the ocean and the role of MTD, 184
 Preventing biofouling with copper-nickel alloys, 181
 Reinforced rubber hose in offshore applications, 187
 Structural materials in marine environments (c), 428
 MATERIALS SCIENCE sans frontières, 370
 MEMBRANE materials - challenges for the '90s (c), 381
 MICROSCOPY
 Are high resolution microscopes too expensive?, 527
 Cathodoluminescence for ceramics, 24
 Ceramic fibre composites under the acoustic microscope, 73
 Microstructural analysis in 3D, 200
 The electron microscope's role in materials research, 376
 MICROWAVE technology for welding and joining, 526
 NUCLEAR FUEL reprocessing, Choosing materials for, 628
 PACKAGING
 Contamination problems with packaging materials, 623
 Material advances in packaging, 621
 POLYMERS
 How do polymers fit into the environmental equation, 303
 Intelligent processing - a quantum leap in quality control, 10
 Measuring viscosity to optimise thermoset processing, 14

PAGINATION

January	1-56	July	361-408
February	57-120	August	409-456
March	121-176	September	457-512
April	177-232	October	513-568
May	233-296	November	569-616
June	297-360	December	617-664

AUTHORS

Abbott, S G, 422
 Ahmed, W, 141
 Allan, P S, 7
 Ansell, P, 376
 Bamkin, R, 17
 Bell, A J, 125
 Bendall, K C, 193
 Bevis, M J, 7
 Booth, D, 475
 Bordas, J, 318
 Briggs, A, 73
 Brown, C, 16
 Brown, M, 200
 Campbell, J, 426
 Cann, J M, 303
 Chapman, J, 139
 Clark, D, 144
 Clementson, T, 202
 Coates, P D, 10
 Coulson, H, 238
 Cubbon, R C P, 135
 Davies, M, 189
 Davis, P W, 243
 Duke, A J, 249
 Edwards, R, 84
 Ellis, D, 240
 Ellis, M B D, 415
 Everson, H, 461
 Eyre, T S, 365
 Fay, P, 418
 Fisher, P M, 310
 Gibson, R, 623
 Gittos, M F, 415
 Glyde, B S, 306, 472
 Goddard, R, 621
 Harrison, K, 532
 Hazell, L B, 532
 Hepburn, A R, 129
 Hick, A J, 147
 Hill, A, 374, 535, 625
 Howick, C, 580
 Kapranos, P, 465
 Kato, H, 365
 Kemp, M, 632
 Lalley, M, 576
 Lennard, D E, 184
 Lloyd, D, 479
 Lowe, K, 577
 ter Maat, H J, 582
 Marshall, J M, 129
 Matthews, A, 133
 Matthews, F L, 146
 McCarthy, P R, 243, 468
 Money, G, 477
 Nicolson, J A, 316
 van den Oetelaar, J, 14
 Peuch, P, 313
 Pickard, A, 17
 Powell, C A, 181
 Pridham, M S, 574
 Priest, M, 374, 535, 625
 Rainforth, W M, 527

 Threadgill, P L, 415
 Tod, D A, 523
 Torrance, A A, 320
 Ward, S D, 318
 Wardlaw, G D, 198
 Whitehouse, C R, 318
 Wilshire, B, 534
 Wood, J V, 80
 Woodward, V G, 246
 Yang, Y, 320
 Yeomans, J, 63
 Preventing stress cracking in high density polyethylene, 246
 Productive system solutions for car bumpers, 14
 Shear controlled orientation: a route to optimised properties, 7
 The environmental audit: regulations and the polymer industry, 475
 PROCESSING
 Intelligent processing - a quantum leap in quality control, 10
 Measuring viscosity to optimise thermoset processing, 14
 Reaction processing, Institute workshop (c), 586
 Semi solid metal processing: an environmentally friendly process, 465
 Shear controlled orientation: a route to optimised properties, 7
 Infrared thermography: a tool for process development, 78
 PRODUCT REVIEWS
 Electron microscopes, 397
 Furnaces and heat treatment, 551
 Hardness and mechanical testing, 105
 Materials testing and analytical services, 443
 Materials testing software, 350
 Microscopy and image analysis, 501
 Microscopy, image processing and metallography, 163
 Moulding and casting, 648
 Nondestructive testing, 601
 Software for the materials business, 100
 Vacuum heat treatment, 43
 QUALITY
 Every man's guide to quality terminology, 238
 Why hardness is vital to statistical process control, 583
 REFRACTORIES in steelmaking, 135
 RESEARCH
 Effective management of materials R&D, 374
 Making the most of Materials Foresight, 426
 RUBBER
 Old tyres are a burning issue, 310
 Reinforced rubber hose in offshore applications, 187
 Rubber chemicals: problems and panaceas, 479
 SEAL performance, The materials key to, 519
 SMART MATERIALS
 Smart systems: not just a flash in the pan, 20
 The science and art of smart materials, 632
 Towards the molecular dimension, 144
 SPECIFICATIONS
 The importance of being specific, 472
 STANDARDS
 A guide to NAMAS, 243
 CEN standards and their implications, 240
 Introducing BS 7750: the environmental challenge, 316
 Taking STEPS towards materials information, 71
 STEEL
 Achieving fuel efficiency with sheet steel automobiles, 133
 Advanced engineering steels for aerospace, 461
 How steel is responding to the new materials challenge, 577
 Refractories in steelmaking, 135
 Steelmakers face up to the challenges ahead, 139
 Talking of bainite and acicular ferrite, 251
 The heat treatment response of aluminium bearing plain carbon steels (c), 147
 SUPERPLASTICALLY FORMED aluminium, 196
 SURFACE ENGINEERING
 Mapping wear behaviour of nitrided steel, 365
 Surface engineering of cutting edges, 141
 SYNCHROTRON radiation: the UK considers a new source, 318
 TESTING
 Infrared thermography: a tool for process development, 78
 Taking the test in thermomechanical fatigue, 468
 Why hardness is vital to statistical process control, 583
 THERMAL PROCESSING
 Examining the options to clean up foundry melting, 77
 Solar hardening of steels, 320
 The heat treatment response of aluminium bearing plain carbon steels (c), 147
 THIN FILM sensors, 129
 TITANIUM based composites: exploiting the benefits, 66
 WEAR, Mapping behaviour of nitrided steel, 365
 (c) = conference report
